

AQUARIUS-02BT

Wireless Active Noise Cancelling
Hi-Resolution Headphones

Enjoy your music

In order to provide a high-quality listening experience, iONE has specially customized hi-resolution dynamic drivers, which can provide pure vocals in a limited cavity space and rub clear and undistorted music. Supplemented by a dual-tone cavity design, highlighting the strong bass rhythm and sound field extension.

Active hybrid noise reduction technology from Japan

iONE cooperates with the Japanese noise reduction algorithm team to provide excellent noise reduction capabilities, and design noise reduction performance for different situations, so that users can get the best noise reduction experience at any time.

Wear headphones and listen to real sounds

Through the ambient sound mode, you can receive real-world sounds while enjoying music. And supplemented by powerful DSP processing capabilities to strengthen the reception of useful information. Let people be independent of the environment, but can embrace the world.

Independent digital audio chip

According to different song types and acoustic characteristics, iONE optimizes and adjusts five sets of different sound field enhancement sound effects through professional sound effects engineers and independent digital sound effects chips to show a deeper musical experience, to achieve a full and appropriate "Sound in its surroundings".

Wireless, high-resolution sound quality

Pursue a higher-quality free experience, equipped with LDAC high-quality Bluetooth, enjoy high-resolution sound quality music in wireless mode.

Features

- 40mm Hi-Resolution drivers built with special tuning titanium diaphragm
- Import iONE professional tuning EQ settings
- Three-stage active anti-noise mode and monitor mode switch
- Can listen to music continuously for up to 20 hours
- Fast charging function, charging for 15 minutes can provide up to 1.5 hours of battery life
- Convenient storage and bendable and foldable design
- LISTEN APP provides diversified listening experience

Specifications

Earphones Type	Closed
Driver Unit	40mm Hi-Resolution dynamic driver with titanium diaphragm
Frequency Response (Bluetooth)	20Hz ~ 40kHz (44.1kHz Sampling rate)
Sensitivities (dB/mW)	116±3dB@ 1mW,1 kHz
Microphone Frequency Response	20Hz ~ 20kHz
Microphone Sensitivities (DB/MW)	-40±3dB
Pick-Up Pattern	Omni-Directional
PROFILE	A2DP, AVRCP, HFP, HSP
SUPPORTED AUDIO FORMAT(S)	SBC, AAC, LDAC
